SUMMARY

As a dedicated Front-End Developer, I bring valuable expertise gained through freelancing on four successful projects. Currently, I am contributing my skills as a React.js Developer at Lead Genie Outsourcing. My proficiency in creating seamless user interfaces, optimizing website performance, and collaborating with cross-functional teams underscores my commitment to delivering high-quality solutions in the dynamic field of web development.

WORK EXPERIENCE

React js Developer

Bortoqala   January 2024 - present

- I worked on the Mernan project, encompassing diverse responsibilities such as:
- Development of chat functionalities including general chat, and support chat
- Implementation of various features such as files, pages, bills, teams, profiles, settings, and projects.

Front End Developer

Freelancer | Kimi Tour   September 2023

- Facilitate the seamless implementation of content and responsiveness on mobile devices.
- Successfully replicated and customized the Viator website.

Front End Developer

Freelancer   July 2023- September 2023

- Execute the implementation of design elements with precision.
- Facilitated effective communication with the backend system to ensure the seamless integration of front-end design, guaranteeing optimal functionality and user experience.

Front End Developer

Freelancer | Dentinzer   July 2023

- Implement and integrate calendar using Flatpickr, enhancing user experience with a user-friendly and efficient data selection tool.
- Promote the responsive of the entire page, employing best practice to guarantee a consistent and seamless experience across various devices.

Front End Developer

Freelancer | Wild and loud   June 2023

- Implemented optimization to enhance the responsiveness of the entire website, ensuring a seamless user experience across various devices and screen sizes.
- Ensure the proper functionality of all scripts across all pages, and implement necessary adjustments to guarantee their optimal functionality.

PROJECTS

Netflix Clone

This project utilizes the Movie Database (TMDb) API to display a variety of movies. Users can add movies to their favorites, and these selections are stored in their profiles, which are retrieved from Firestore. Technologies: React, Tailwind, Firebase, and API

Technologies	React, Tailwind, Firebase, and API
GitHub Link	https://github.com/mariam-elsarag/netflix
Live	https://reacty-netflixy-12.web.app/

Coral

Coral is an e-commerce platform where users can conveniently filter products by price or alphabetical order. It features user-friendly categories for easy navigation and is fully responsive

Technologies	React, and Tailwind
GitHub Link	https://github.com/mariam-elsarag/coral
Live	https://e-commerce-coral.netlify.app/

Delizus

Delizus is a restaurant website that features the restaurant's menu, upcoming events, and detailed information about the establishment.

Technologies	HTML, CSS, and JavaScript
GitHub Link	https://github.com/mariam-elsarag/Delizus
Live	https://mariam-elsarag.github.io/Delizus/

Delivery

Delivery is a simple landing page where I use Local Storage to toggle between dark mode and light mode.

Technologies	HTML, SASS, and JavaScript
GitHub Link	https://github.com/mariam-elsarag/Delivery
Live	https://mariam-elsarag.github.io/Delivery/
